

## Neoxen Visual Modus Release 10.58

## Product Fact Sheet

*Neoxen Visual Modus is a Windows Desktop Explorer for SharePoint. It provides desktop access for multiple SharePoint sites. It allows you to manage and share documents, restructure folders and other resources stored in SharePoint.*

*Copy, move, add and remove entire folder structures. Check in, check out, and send to other locations or email. Drag & Drop emails and email attachments directly to SharePoint. Manage versions and properties. Create new documents from templates or seed files.*

## Key Benefits

### Accelerate Information Access

With its intuitive *NaviList™* approach, Neoxen Visual Modus saves time, and lowers costs in managed information access. A Single Point of Access to information located in diverse systems accelerates data retrieval, thus increasing productivity.

A *NaviList* in Neoxen Visual Modus is a private or shared workspace. It is presented as a tree structure in the user interface. It is a hierarchical collection of Information Objects.

### Simplify Navigation

Logical *NaviLists* to shared data regardless of the physical structure, storage or location enable your team members to quickly navigate to relevant, up-to-date information. Reduce time, frustration and costs related to common “trying-to-find” tasks.

## **Simplify the Complexity**

Work seamlessly with Content, Collaboration, Document Management, and legacy systems through the NaviLists. Simplify your working environment, focus and prioritize. Reduce the amount of time spent dealing with the complexity of an information-rich environment.

## **Reduce Duplication**

Sharing NaviLists to documents instead of the documents themselves prevents duplicates, preserves consistency and drastically reduces information overflow. Reduce the amount of mismatched document versions and optimize productivity by keeping your team members working with up-to-date information.

## **Increase Personal Productivity**

Manage multiple concurrent sessions to diverse web services. Save snapshots from your essential data. Create and organize your own survival kit for fast access to your vital tools, editors, scripts, documents, links and other information. Produce more with less time and less effort.

## **Increase Workgroup Productivity**

Introduce NaviLists into your organization, make it a principle and reduce the time used for unnecessary data searching. Share information with your team with a single point of access to multiple data sources. Deliver the relevant information instantly and reduce costs – both human and material.

## **Rapid Deployment**

Any user can set up a NaviList in seconds, without the effort of setting up secure servers, configuring networks, or adding additional access rights. Bringing a team together is fast, simple and secure.

## Key Features

- Combine entire SharePoint 2016, 2013 and 2010 sites or only certain folders to logical hierarchies.
- Combine your FTP, intranet, file share, WebDAV and SharePoint sites.
- Link documents, instructions, descriptions, web links or folder contents together and store them as NaviLists.
- Check-in/out, metadata, versions, history, briefcase, transmittals, workflows, search, etc.
- Drag & Drop between desktop, SharePoint sites and libraries, email and other systems, such as Bentley ProjectWise, FTP and WebDAV sites
- Extensive support for Document Template Libraries and Seed Files
- Extensive email support. Drag & Drop emails and attachments between Outlook and SharePoint. Send and receive links to SharePoint contents. Send and receive NaviLists as XML definitions
- SharePoint Organizer for managing and synchronizing local and server copies of the documents
- List of Last Used items keeping track of folders and documents you have been working on
- Favorites hierarchy for you to store your favorite locations in different systems for easy access
- Hierarchical NaviLists to SharePoint contents across library and site boundaries
- Integrates with unlimited number of SharePoint sites simultaneously
- No data duplication, no data conversion
- Combines Windows/Web/Mobile SharePoint access

## Customization

Neoxen Visual Modus is widely customizable, including the graphical look, icons, program names, etc. You can create a “User Experience”, a look and feel to match your organization’s expectations. You can also extend the menu system and toolbars, and create command add-ons.

The basic customization can be done without programming. For OEM customers and developers there is a Neoxen Visual Modus SDK to extend the system with Microsoft Visual Studio 2015 or 2013. Through the API you can create custom functionality and integrate with almost any system.

Dynamic multi-language support allows you to create industry specific terminologies and use them instead of the provided standard localizations.

## Neoxen Visual Modus Editions

Neoxen Visual Modus has 32-bit and 64-bit versions available: The x64 Edition brings opportunity to take full advantage of 64-bit computing today. Language Packs are available in multiple languages and the Localization Kit is available on request.

## Availability of Neoxen Visual Modus SDK

The SDK for Neoxen Visual Modus Release 10.58 is available directly from the vendor. Please visit our web site at <http://www.neoxen.com> or contact our sales department at [sales@neoxen.com](mailto:sales@neoxen.com).

---

**Note:** Nothing contained on this document should be construed as a commitment on the part of Neoxen Systems to license any particular person or entity to use the Neoxen Visual Modus SDK Software and Documentation. While Neoxen Systems welcomes all inquiries regarding the product and technology, Neoxen Systems reserves the right to refuse to license the Neoxen Visual Modus SDK Software and Documentation to anyone for any reason.
