

**Press Release - 6/9/2003**

**Genestia Group, Inc released Neoxen® Qwinux™ R4.1.2 for concurrent Windows & Linux development**

*Genestia Group, Inc, a technology provider of system software, business development and systems integration solutions, has today released Neoxen® Qwinux™ - the first truly professional distribution of 'best-in-class' Open Source tools compiled and certified for Microsoft® Windows® operating systems.*

As the first product of its kind, Neoxen® Qwinux™ is a unique professional distribution designed to meet the needs of all developers as the most comprehensive Open Source programming resource available for Microsoft® Windows®. It is formatted in easy to read HTML and provides the most comprehensive selection of 'best-in-class' tools and documentation composed into a single unified distribution. Neoxen® Qwinux™ distribution CD-ROM brings a chosen set of the leading Open Source programming & productivity tools to your Windows desktop. These include the likes of wxWindows, Python, Perl, Inno Setup, CVS, Doxygen, Ghostscript, and WinGW, which again contains most of the proven GNU tools compiled for Windows. Not only does this release give the users access to all the software ready-to-install and ready-to-run, but it also is the ultimate source of information.

Neoxen® Qwinux™ is designed for project groups, systems integrators and independent software vendors for rapid transition from one platform solutions to concurrent Windows and Linux programming.

"R4.1.2 is built as a Web site on a CD, which allows you to set it up directly into your intranet for online access", says Esa Tervo, Chief Executive Officer and CTO at Genestia Group, Inc. "This release is also a superb knowledgebase containing huge amount of selected documentation in the formats of your choice, such as HTML, Compiled HTML and PDF. Neoxen® Qwinux™ and the forthcoming value adding releases are important steps in
