

## **For Immediate Release**

**Press Release – 13.4.2005**

# **Neoxen Systems and Novell bring Process Improvement Solutions to Novell® Linux Desktop and SUSE® LINUX Professional**

*Neoxen Systems, a European software company developing process management solutions, has today released its process improvement product for Novell platforms. The Neoxen® Modus Lite release 3.1 is specifically targeted at software professionals using Novell Linux Desktop 9, SUSE LINUX Professional and OpenOffice.org 1.1.*

The Neoxen Modus product family is designed for software professionals who create and manage software development processes to gain efficiency and competitive edge. Easy-to-use templates and support packages help IT managers, developers, and software industry organizations control all aspects of software production processes more efficiently.

"Neoxen Modus Lite will enhance the availability and speed of development of software applications for Novell Linux Desktop and SUSE LINUX Professional" says Johan Rosius, Vice President, Alliances Novell. "The practical approach to process improvement and the well structured professional template libraries in Neoxen Modus Lite perfectly match with our customer demands."

Esa Tervo, Chief Executive Officer at Neoxen Systems explains that, "The combination of Novell platforms and Neoxen Modus illustrate how the open source community and commercial vendors can deliver remarkable benefits for professional Linux users. These benefits include easy

adoption, competitive pricing and robust services and support.

Neoxen Modus Lite for OpenOffice.org is an essential part of Neoxen Systems solution offering for software development groups supporting both open source and commercial software development. There is considerable evidence in savings in process development costs with Neoxen Modus Lite using Novell platforms. Linux is becoming a viable alternative as desktop computing environment."

Neoxen Modus Lite supports both rapid software development projects and continuous organizational process development. This flexibility makes Neoxen Modus Lite suitable for starting businesses and more established companies. Neoxen Modus Lite shares the common standards compliant methodology, which is the base for all Neoxen Modus Family products built on top of the Neoxen QX Framework technology.

Neoxen Modus Product Family is developed under official EUREKA status, which was granted in EUREKA Ministerial Conference on the 18<sup>th</sup> of June 2004 in Paris.

Neoxen® Modus Lite Release 3.1 is available directly from the Neoxen Web Store and from the well-equipped resellers.

For more information about availability, licensing, upgrade policy and other sales related matters, please contact Neoxen [Sales Department](#).
