## For Immediate Release

Press Release – 26<sup>th</sup> of March, 2013 - Turku, Finland

## Neoxen invited to join exclusive “Azure Circle” Partner Program

**Neoxen Systems today announced it has been invited to join the invitation-only Windows Azure Circle Partner Program, a global group of selected Microsoft partners that serve organizations interested in moving to the cloud utilizing Windows Azure.**

“As one of the first partners invited from the educational sector in Western Europe, this is a great acknowledgement for us”, says **Esa Tervo**, Chief Executive Officer at **Neoxen Systems**. “By joining the Windows Azure Circle, we have proven our mastering of Microsoft cloud technologies and our continuous commitment to provide state-of-the-art solutions and services to our customers.”

“This achievement acknowledges the serious investment Neoxen is making in developing and delivering world-class cloud computing solutions on Microsoft’s Windows Azure Platform.” Esa Tervo continues. “The awarding of Azure Circle partnership status is a clear recognition of our successful track record working with the Azure Cloud environment.”

Microsoft Azure Circle program has been established to create a global support structure for Microsoft customers who would like to leverage the most of the Microsoft Cloud platform. Azure Circle Partners provide customers the exclusive benefit of structured consulting engagements and help them to build new Azure infrastructure and migrate existing on-premises solutions to the cloud.

**Windows Azure** is a cloud computing platform and infrastructure for building, deploying and managing applications and services through a global network of Microsoft-managed datacenters. It provides both platform as a service (PaaS) and infrastructure as a service (IaaS) services and supports many different programming languages, tools and frameworks, including both Microsoft-specific and third-party software and systems. Windows Azure is a foundation for running applications and storing data in the cloud - all in a secure environment with over 99.9% uptime.
