For Immediate Release

Press Release – 8th of March, 2010 - Turku, Finland

Neoxen to integrate Lingsoft's Linguistic Tools with eLearning Solutions

Neoxen Systems and Lingsoft Inc., a Natural Language Processing specialist, are bringing world-acknowledged multilingual tools to SharePoint based eLearning solutions.

"As a leading **Microsoft Learning Gateway** specialist Neoxen is a natural choice for us. Their expertise and their award winning products bring real-world benefits for teachers and students - and for the educational sector as a whole." says Juhani Reiman, Managing Director at Lingsoft. "Today our acknowledged language processing tools are widely used in publishing, communications and media businesses – as well as in the academic world. Now we can offer them to schools and educational institutes at any level to support teaching and learning."

"For the first time the professional readers' and writers' tools are now available for teachers and students on every educational level – from elementary schools to high schools and colleges." says Esa Tervo, Chief Executive Officer at Neoxen Systems. "For instance Lingsoft's industry standard proofing tools, based on word and sentence analysis, ensure high-quality authoring in multiple languages. Together with their search and text mining solutions we can provide remarkable added value to our Visual Modus and Microsoft Learning Gateway users."

Lingsoft's products include readers' and writers' tools, search and indexing tools, speech tools and "instant" dictionaries. In addition Lingsoft offers text mining solutions, as well as components for morphological and syntactical analysis and generation. Lingsoft produces the proofing tools for all Nordic languages included in Microsoft Office.

Neoxen NaviList - Open Standards

Neoxen embraces XML based open industry standards for interoperability. For instance Neoxen Visual Modus integrated with **Microsoft Learning Gateway** allows users to link documents, instructions, descriptions, web links, folder contents, tools, eBooks and eBook libraries, and to store them as logical XML-based NaviLists.

Together with Neoxen EveryPlace™ extensions, NaviLists integrate almost any desktop application with Microsoft Office SharePoint and **Microsoft Learning Gateway**. This intuitive approach allows users to access the entire information directly from their productivity tools.

Lingsoft – *Lingsoft, Inc. is an international full-service language company providing an entire range of services and solutions including translations and glossaries, writing and reading tools, search facilities, text mining, teaching applications and speech-enabled services, as well as ebooks. Lingsoft products support all common platforms and software suites. Lingsoft supplies proofing tools for Microsoft Office for no less than seven languages. The solutions are based on Lingsoft's proprietary language structure analysis that has become the industry standard in the field.*
