

## For Immediate Release

Press Release – 13<sup>th</sup> of February, 2009 - Turku, Finland

## Neoxen® Trelox QX R10.0, the “Omega” Release

**Neoxen Systems has today announced the Next Generation Release of their 32/64-bit Embedded Application Server designed for integration and communications solutions.**

Neoxen Trelox is a multi-platform embedded application server for both general and peer-to-peer communications and information integration. It is scalable, easy to deploy, integrated and interoperable with other applications. The new release is fully compliant with Microsoft Windows 2008 Server and Microsoft SQL Server 2008. Neoxen Trelox is powered by Neoxen QX Framework as the Foundation Technology and it scales from small hand-held and embedded devices to clustered Windows/Linux server environments.

“This major release extends Trelox as a family of server and agent products. New components are utilized in automated software updates, workstation services and in scheduled tasks”, says Sari Peltonen, Chief Technology Officer at Neoxen Systems. “Our OEM Partners will greatly benefit of this new functionality in their distributed communications systems”

Neoxen Trelox QX is fully internationalized and can be localized in any languages, including Chinese Simplified, Traditional Chinese, Japanese, Arabic and Hebrew.

Neoxen Trelox QX is designed for project groups, systems integrators and independent software vendors for developing scalable communications systems. Neoxen Professional Services uses it together with Neoxen QX Framework as foundation technology in all the customer projects requiring a robust, high-performance platform.
