

## For Immediate Release

Press Release – 30th of April, 2007 - Turku, Finland

## Visual Modus 2007 Certified for Windows Vista

As an already certified product for Microsoft Windows XP the Neoxen flag-ship solution is now fully tested for Microsoft Windows Vista as well. As a proof of compatibility, Visual Modus 2007 is one of the first commercial information management products authorized to use Microsoft's Certified for Windows Vista logo.

Visual Modus 2007 is tested by the independent US test laboratory and is certified for Windows Vista and Windows XP environments thus fulfilling demanding international quality standards.

Compatibility with Windows Vista was verified during extensive beta program. Beta testing offered a lot of useful information to support product development and assured the software functionality and stability on this new platform. Vista logo is an important guarantee for the quality and reliability of the product especially for the international markets.

Neoxen Visual Modus 2007 offers a simple and effective way to collect links to real time information into team- and role-based views regardless of the backbone systems. It is possible to integrate important documents, process models, tools and other essential information to the views. Visual Modus 2007 gathers company's backbone systems and team applications straight to user's digital workspace.

### **Windows Vista brings tangible benefits for Visual Modus 2007 software users**

The new features in Windows Vista bring additional value to the customers. As an example the new more efficient search functions together with the intuitive user interface speed-up information retrieval. The renewed user experience improves the usability and allows tighter integration between the desktop, Office 2007 and Visual Modus software.

### **Visual Modus 2007 and Microsoft Office SharePoint Server 2007 (MOSS)**

As one of the first Windows Vista certified information management products, Visual Modus 2007 opens direct Windows interface to 2007 Microsoft Office SharePoint Server services. Visual Modus extends MOSS with advanced features especially targeted for project organizations.
