

For Immediate Release

Press Release – 27th of March, 2009 - Turku, Finland

Changing your hat, virtually

Powerful tools to create and share role based sets of documents from the same cloud of information.

Collaborative systems are essential when project teams are formed of people scattered across the globe. These teams, supporting systems and documents form a cloud of information. Those project teams which spend less time navigating in the cloud are more efficient and a real advantage to the companies.

The just released Neoxen® Visual Modus™ QX product family has a unique new feature which increases team efficiency in scattered information environments: Neoxen® NaviList™

Neoxen NaviList - Intelligent Shared Navigation

Neoxen NaviList gathers team and project information into a one easy to use structure. NaviLists are easy to share between teams and project stakeholders. When NaviLists are used together with Neoxen Visual Modus QX, teams and projects can transparently use content which is scattered around team and corporate information systems, such as Microsoft SharePoint and Bentley ProjectWise.

"Everybody knows the metaphor where one changes his/her role in a team by changing a hat. In a matrix organization, everybody has several roles to play", says Tero Toropainen, Chief Operating Officer at Neoxen Systems. "Using Neoxen NaviList is just like changing a hat: By changing NaviList one has a different virtual view, but the cloud is the same. NaviList displays only that information which is relevant to your selected role."

Real World Benefits

Typically, companies use Neoxen Visual Modus QX in order to increase their project management efficiency. In real world cases, companies boost their project throughput and profitability with a set of NaviLists. Project teams using Visual Modus and Neoxen NaviLists make fewer mistakes and spend less time when navigating through thousands of projects and project documents.

Together with Microsoft Office SharePoint Server 2007 (MOSS)

Visual Modus QX operates as an integral part of Microsoft Office 2007. Together with **Neoxen**[®] **EveryPlace**[™] extensions, Visual Modus QX integrates almost any desktop application with Microsoft Office SharePoint.

Neoxen Systems - *Microsoft Gold Certified Partner and Microsoft Visual Studio Industry Partner* - is a fast growing Finnish Software Company with out-of-the-box products and services with deep industry and business expertise.
