

Press Release - 12/22/2004

Neoxen Systems released Neoxen® QX Framework Release 5.1.0 for .NET

Neoxen Systems, an internationally operating technology and consulting company has today released Release 5.1.0 for their Neoxen® QX development platform targeted for distributed business application and systems integration solution vendors.

“Release 5.1.0 is a remarkable maintenance update with multiple enhancements to user interface components and API. Extended user interface features include localization support for Eastern European and Asian languages and the GDB engine includes a Dynamic SQL Interface for creating SQL statements on the fly”, says Esa Tervo, Chief Executive Officer at Neoxen Systems. “Other API improvements include a new functionality where created services can install and uninstall themselves. They also support interactive command line mode with tracing”.

Neoxen® QX Framework is a powerful toolkit for rapid production of system software components and distributed multi-tier business applications for Microsoft® Windows® operating systems. It provides an internationalized small-footprint foundation, which drastically shortens design and implementation time and significantly reduces the overall project and development costs.

Neoxen® QX Framework is designed for project groups, systems integrators and independent software vendors for rapid system software development. Neoxen Professional Services uses it as a foundation technology in all the customer projects requiring a robust, high-performance platform.

Neoxen® QX Framework Release 5.1.0 is available directly from the [Neoxen Web Store](#).
